

Avis Fleet App

Save time, save money,
and mitigate risk

Driver Self-Service App

We are excited to be rolling out the Avis Fleet Self Service App. We are proud to provide this cutting-edge technology to our employees and customers. New features will continue to be added to our app as we keep improving your experience with Avis Fleet and we will keep you updated on these.

Some App Features

Self-inspection

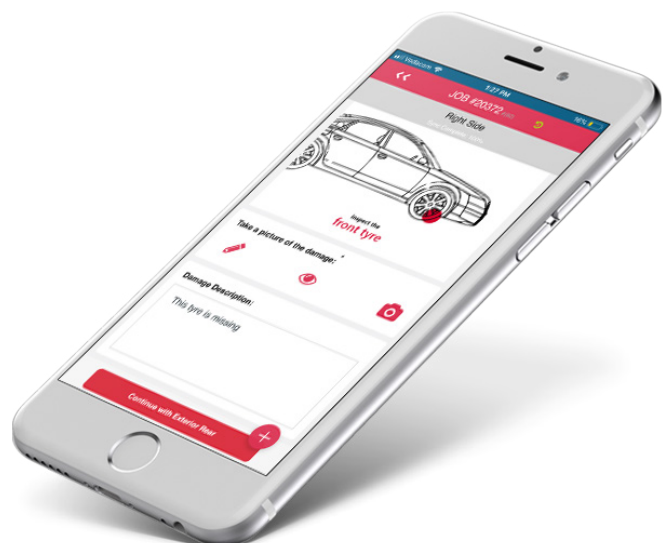

You now have the ability to inspect vehicles and report on their condition.

Odometer Updates

Can be updated by you and automatically uploaded to the Avis Fleet database. This feature is particularly useful when fuel cards haven't been provided by Avis Fleet.

Profile Updates

This includes personal and driver's licence information which can be completed to ensure accurate, up to date information.

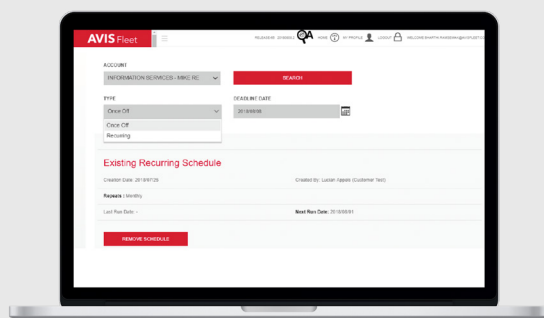

Some App Benefits

1. The app minimises the cost of external inspections, you can schedule regular self-inspections across the entire fleet. Ad-hoc vehicle inspections can be made to supplement existing inspections.
2. You now have the ability to update vehicle odometer readings anytime and seamlessly upload this data on to the Avis Fleet platform. Added benefits include service reminders, usage statistics and more.
3. Make vehicle inspections in remote locations easier. Avis Fleet can now ensure that vehicles are in optimal condition and ready for any task. End-of-termination billings can be dramatically reduced.
4. The app integrates with our Fleet Interactive tool and will provide Fleet Managers and authorised personnel with the most recent vehicle condition and driver information 24/7.

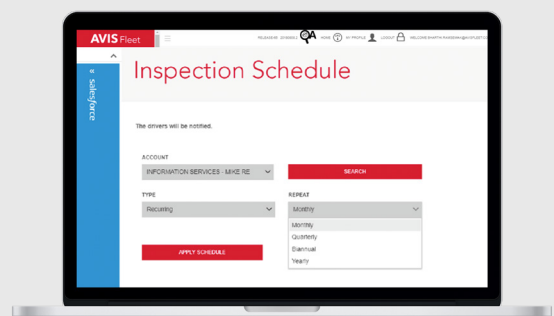

What Can You Do

1. Fleet Managers can log into Fleet Interactive and view either the history of inspections or schedule an inspection.

2. A Fleet Manager can schedule inspections on a vehicle as a once-off for the account or on a recurring schedule. Any existing schedules will be displayed for the Fleet Manager to view.

3. Recurring schedules can be monthly, quarterly, bi-annually or annually. Once an inspection is completed the inspection report will be reflected in the history of inspections.

Getting Started

The App is available on both Apple and Android smartphones. You can download the App from your App Store (iPhone) or Play Store (Android). Use the search "AvisFleet".
